PROFILE

Aspiring Software Developer and Data Analyst currently pursuing a third-year B.Sc. in Computer Science with Data Analytics. Skilled in Python, SQL, React.js, JavaScript, HTML, CSS, and data visualization, with hands-on experience in developing responsive web applications and AI-driven projects. Passionate about solving real-world problems through technology, continuously learning emerging tools, and contributing innovative solutions in collaborative environments.

EDUCATION

KPR College of Arts, Science and Research Coimbatore	2024 – Present
<i>Bachelor of Science Computer Science with Data Analytics</i>	Coimbatore
Aggregate of 90.5%	

The NGP School	2024
<i>Class XII (CBSE)</i>	
90.2%	

The NGP School	2022
<i>Class X (CBSE)</i>	
91.2%	

EDUCATIONAL ACHIEVEMENTS

Certificate of Proficiency - Highest Academic Performer, B.Sc., CSDA	2025
<i>KPR College of Arts, Science and Research</i>	

Award for Pursuing Academic Excellence	2023
<i>The NGP School</i>	

Secured Zonal Rank 1 (South) in Commerce Olympiad	2023
<i>ICSI</i>	

PROFESSIONAL MEMBERSHIPS

IEEE Student Member
(2026 – Present)

- Member of the world's largest professional organization for technology and engineering.

SKILLS

Programming Languages — Python, Java
Data Analytics — Data Analysis, Data Interpretation, Data Visualization
Tools & Technologies — Power BI, MS Excel, GitHub, OpenCV
Soft Skills — Communication, Teamwork, Time Management
Core Concepts — Problem Solving, Database Fundamentals, Analytics

INTERESTS

Data Analytics | Cybersecurity Trends

PROJECTS

Driver Drowsiness Detection System

Technologies: Python, OpenCV, dlib

- Developed a real-time driver drowsiness detection system to identify fatigue and reduce accident risks.
- Implemented computer vision techniques to monitor eye closure and facial landmarks.
- Designed an alert mechanism to notify drivers during signs of drowsiness.
- Improved detection accuracy using real-time image processing methods.

Industrial Monitoring System

Technologies: IoT, Python, Data Monitoring

- Designed an IoT-based industrial monitoring system with anomaly detection capabilities.
- Collected and analyzed sensor data to monitor industrial parameters in real time.
- Applied anomaly detection techniques to identify abnormal patterns and potential system failures.
- Improved operational efficiency through continuous monitoring and early warnings.

Mini E-Commerce Cart System

Technologies: React.js, Vite, JavaScript, HTML5, CSS3, React Router DOM, Local Storage

- Developed a responsive single-page e-commerce web application using React.js and Vite.
- Implemented product search, category filtering, price sorting, and dynamic shopping cart functionality.
- Built a complete checkout workflow with quantity management, order summary, and Local Storage integration.
- Designed reusable React components and a user-friendly interface to deliver a seamless shopping experience.

Real-Time Production and Inventory Management System for Garment Manufacturing (Ongoing)

Technologies: Python, SQL, HTML, CSS, JavaScript

- Developing a real-time system to monitor garment production and inventory operations.
- Designing modules for raw material tracking, production monitoring, and stock management.
- Implementing database-driven inventory management and production analytics.
- Aiming to improve operational efficiency through real-time insights and automated reporting.
